

Simplicity – anywhere, at any scale

Qumulo is the only data platform you need for your multicloud strategy. We make it simple to scale, manage, and move data across the platform or cloud of your choice with no refactoring needed. Fortune 500 companies, major film studios, and the largest research facilities in the world trust Qumulo to help them securely store, manage, and innovate with their mission-critical data. Qumulo makes data management simple with continuous new features, a single solution for all workloads, and access to customer success experts on your schedule.

We make it simple to store, manage, and mobilize your unstructured data at exabyte scale across any environment — on-prem, in the cloud, and at the edge. Whether you're discovering new medical treatments, keeping a stadium secure, or making a blockbuster movie, Qumulo lets you focus on your business and not the complexity of managing your systems.

The scale-anywhere data solution

Organizations are gearing up for the future using technology from the past. Many unstructured data platforms in modern enterprises are based on 20-to-30-year old architectures. Today's enterprises need to store and manage hundreds of petabytes of unstructured data. They need to be able to move that data seamlessly and at massive scale between their on-prem and cloud environments.

Businesses also need to optimize application workflows while delivering on organizational mandates for data protection, retention, and security. With no volumes or storage tiers, with an API-first management model, and with a platform-agnostic architecture that works equally well in the cloud as on-prem, Qumulo makes it simple to consolidate your unstructured data onto a single solution that delivers real-time data visibility, management automation, and ease-of-use to meet your performance, processing, and data retention requirements.

Customers are our magnetic field.

We work with some of the best partners and platforms in the industry, combining the power of Qumulo with the performance and reliability of our partners to enable world-changing creation, discovery, and innovation.

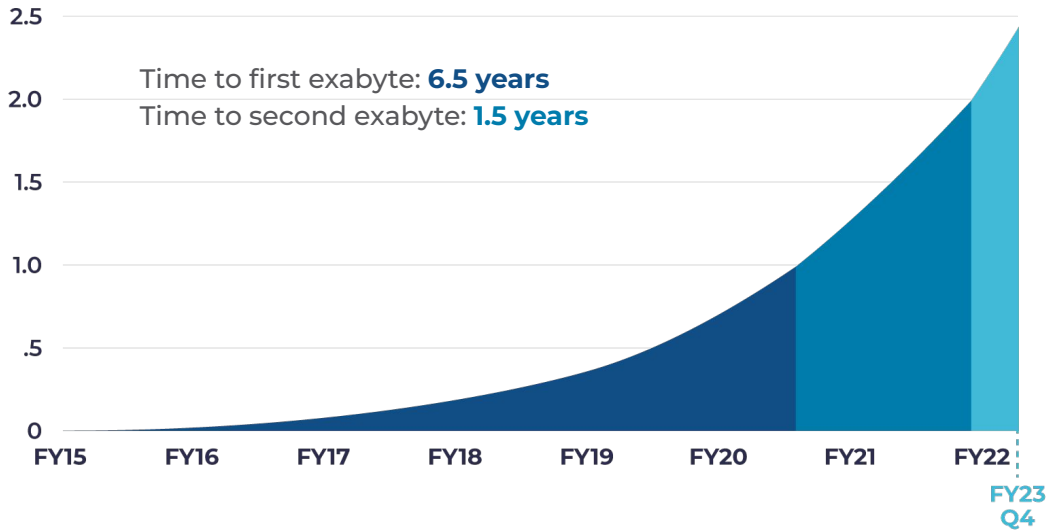

About Qumulo

Based in Seattle, Wash., Qumulo has raised \$351 million in funding, including \$125 million in Series E funding, at a valuation of more than \$1.2B. The financing, led by funds managed by BlackRock, includes strong participation from Goldman Sachs, Highland Capital Partners, Madrona Venture Group and Kleiner Perkins.

Exponential Growth

Run anywhere with radical simplicity

Qumulo's file storage is designed with platform flexibility in mind, allowing users to drive down costs without vendor lock-down. Our software architecture runs on enterprise-class hardware from our at HPE, Supermicro and Fujitsu, as well as in the public cloud with AWS, Azure, and GCP. The choice is always and entirely yours.

Industry Recognition

Don't take our word for it, Gartner has awarded Qumulo a position as a Leader in its Magic Quadrant for Distributed File Systems and Object Storage for the fifth consecutive year. We've also been named an IDC MarketScape Leader, and have earned a 4.9 out of 5 in Gartner's Peer Insights page.
